Trochu (dávnej) histórie

Android, Inc., founded in Palo Alto in Oct 2003 by Andy Rubin, Rich Miner aim to develop:

- "smarter mobile devices that are more aware of its owner's location and preferences"
 - an advanced operating system for digital cameras,
- founders and early employees, Android Inc. operated secretly, just working on software for mobile phones

Current (!) rivals Symbian and Windows Mobile

(Apple's iPhone had not been released at the time ... 2007).

Rubin ran out of money. Steve Perlman (QuickTime, WebTV, later working on iPhone, iPods), a close friend of Rubin, brought him \$10,000 in cash in an envelope and refused a stake in the company.
